

P3 SUPER PLUG (SAMPLES)

P1 & P2 PLUGS (SAMPLES)

Our Forestry Plugs are easy to plant and typically experience minimal transplant shock and high survival rates. The plug of soil and roots and overall biomass of the trees increase with each incremental plug size.

Specs for the soil plug surrounding the roots:

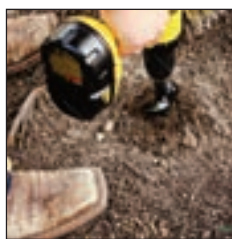

P1 size | 1.1" Dia. | 3.74" Depth | 3.7 cu Inch soil plug

P2 size | 1.24" Dia. | 4.33" Depth | 4.9 cu Inch soil plug

P3 size | 2" Dia. | 5.96" Depth | 15.3 cu Inch soil plug

Plug Planting Augers

Our quality plug planting augers make planting plug trees a snap. Simply plug into your cordless drill and speed your way through planting. Order the PPA-1 to plant our P1 and P2 size plugs and the PPA-3 to plant our P3 size Super Plugs.

BALSAM FIR *Abies balsamea*: The classic short-needled Christmas tree. Shears very well and has a wonderful fragrance. Shiny, soft green needles and boughs make this a favorite of wreath makers. Likes well-drained, cool areas. May grow up to 12" annually under ideal conditions. 50-70'H x 20-25'W : Zones 3-5

SKU	Sizes	Qty:	1-5	6-11	12-24	25-49	50-99	100-249	250-499	500-999	1000+

NEW!

CANAAN FIR *Abies balsamea var phanerolepsis*: This elegant fir with dark green to bluish fragrant needles is a fine choice for Christmas tree production. With dense foliage it is stunning in groups or as a specimen. In all but the wettest conditions, Canaan Fir is grown successfully in most soils except heavy, wet clay. With a later bud break, spring frost injury is less likely than that of Fraser and Balsam. Good drought tolerance once established. 45-55'H x 15-25'W : Zones 4-7

SKU	Sizes	Qty:	1-5	6-11	12-24	25-49	50-99	100-249	250-499	500-999	1000+

NEW!

CONCOLOR FIR *Abies concolor*: With long lasting needles, the Concolor, or White Fir is a great Christmas tree choice! Widely used in home landscape, it is generally disease and pest resistant. Citrus scented blue-green needles. Good nesting and shelter for game birds, song birds and small mammals. 30-50'H x 15-25'W : Zones 3-7

CONCOLOR FIR

DOUGLAS FIR

FRASER FIR

CANADIAN HEMLOCK

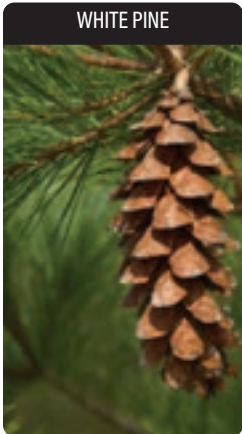

RED PINE

RED PINE *Pinus resinosa*: One of our top sellers, this long-needled columnar pine is a fast grower, especially in sandy, dry areas. Self-pruning, a favorite of the paper companies for its disease resistance and future as a pulp producer. Try with Hybrid Poplar for a fast windbreak or add other Pine and Spruce for diversity. 60-80'+H x 30-40'W : Zones 2-6

SKU	Sizes	Qty:	1-5	6-11	12-24	25-49	50-99	100-249	250-499	500-999	1000+

WHITE PINE

WHITE PINE *Pinus strobus*: This Wisconsin native is very adaptable to a variety of soil types. FAST in sandy locations. Soft, mid-length needles are five in a cluster. Irregular columnar shape. Great timber producer or Christmas tree with good needle retention but little scent. Excellent deer cover. 60-80'H x 20-40'W : Zones 3-8

SKU	Sizes	Qty:	1-5	6-11	12-24	25-49	50-99	100-249	250-499	500-999	1000+

AMERICAN SYCAMORE

BLACK WALNUT

Dormant, Bare Root Shrubs

www.chiefrivernursery.com

SPECKLED ALDER *Alnus rugosa*: Best described as a clump forming shrub or small tree. Thrives in wet areas but will grow in upland areas with adequate moisture. If left to grow naturally, a dense thicket will form over time. Used as a protective shelter by deer, rabbits, moose and other forest animals. 12-20'H x 8-10'W : Zones 2-6

SKU	Sizes	Qty:	1-5	6-11	12-24	25-49	50-99	100-249	250-499	500-999	1000+

AMERICAN ELDERBERRY *Sambucus canadensis*: An early flowering, spreading shrub that produces berries in the fall. This adaptable, large size plant can handle wet areas and many soil types. Raw, unripened berries and plant parts are toxic to humans and animals. Only the blue-black, ripened berries should be picked and eaten or processed into other foods. Ripened berries make excellent pie, wine and jam. Great for naturalizing an old farm field for wildlife cover. Grows 10' tall and at least as wide. Both elderberries need another variety of elderberry present nearby for pollination. 10-15'H & W : Zones 3-9

SKU	Sizes	Qty:	1-5	6-11	12-24	25-49	50-99	100-249	250-499	500-999	1000+

HIGHBUSH CRANBERRY

ROSA RUGOSA

NANNYBERRY VIBURNUM

WINTERBERRY

NANKING CHERRY *Prunus tomentosa*: Very attractive smaller ornamental growing 6-10'. Beautiful spring blossoms give way to an edible fruit for all your jams and pies. Excellent for birds. Easy to grow in a variety of soil conditions : Zones 4-8

SKU	Sizes	Qty:	1-5	6-11	12-24	25-49	50-99	100-249	250-499	500-999	1000+	
BNC-S1	18"-24"	Seedlings	Each	\$10.20	\$8.69	\$6.59	\$5.22	\$3.98	\$3.48	\$2.64	\$2.44	\$2.22

NINEBARK *Physocarpus opulifolius*: A versatile and tough shrub that grows in most soil and moisture conditions. Fast growing to 8' tall, this multi-stemmed, green leafed shrub produces flowers for bees and butterflies in spring and seeds for birds in fall. Dense form provides good cover and nesting sites for birds. 8-10'H x 12-15'W : Zones 2-7

SKU	Sizes	Qty:	1-5	6-11	12-24	25-49	50-99	100-249	250-499	500-999	1000+

MOORPARK APRICOT Larger than other apricots, Moorpark has white-pink blossoms in spring and sweet and juicy fruit from July to late August. Moderate growing and self-pollinating, you will experience a larger crop if two trees are planted within 50' of each other. Mature height and spread 15'-20'. Our 18"-24" stock grows in Zones 4-8 **SKU: FMA-S1** \$23.45

CHESTER BLACKBERRY Self-pollinating, thornless, summer-bearing on 2nd year canes. Large, sweet berries. Tasty fresh, for baking and preserves. Full sun. Fast grower 4-5' tall and 3-4' wide. Our 9"-15" stock grows in Zones 5-8

SKU	Sizes	Qty:	1-4	5+
FCB-S1	9"-15"	Each	\$15.35	\$14.30

BLUECROP BLUEBERRY A cold hardy blueberry, one of the most popular in the U.S. This bush is easy to grow, self-pollinating, and the blueberries taste great fresh or frozen. A consistent producer, the Bluecrop is ideal for eating raw or making pies and cobblers. Mature height 4-6', spread 3-4'. Grows in Zones 4-8

SKU	Sizes	Qty:	1-4	5+
FBB-S1	8"-12"	Each	\$17.75	\$15.65

HERITAGE RASPBERRY Everbearing in July and August until frost! Self-pollinating, with large, firm dark red berries. Delicious fresh or preserved. Strong canes, no stakes required. Prefers fertile soil, amend with organic material if needed Full sun. Fast grower to 5-6' tall and wide. Grows in Zones 4-8

SKU	Sizes	Qty:	1-4	5+
FHR-S1	9"-15"	Each	\$15.35	\$11.75

CONCORD SEEDLESS GRAPE This Zone 4 multi-purpose grape is easy to grow. Makes delicious wine and jam. Edible, but on the sour side. Great for deer and birds. Grows in Zones 4-8

SKU	Sizes	Qty:	1-4	5+
FCG-S1	8"-12"	Each	\$15.35	\$13.60

SOMERSET SEEDLESS GRAPE Simply put, you will love the strawberry-like flavor of this seedless table grape. Large crops of red grapes only get sweeter as you let them ripen from pink to deep red. When eating, a firm and crisp flesh quickly gives way to juicy sweetness. This disease resistant variety is also used to make juice and jelly. Grows in Zones 4-8

SKU	Sizes	Qty:	1-4	5+
FSG-S1	8"-12"	Each	\$16.15	\$15.15

NEW! **MONTMORENCY CHERRY** The most popular sour cherry sold in the U.S. Blossoms in late spring, producing fruit two months after bloom. Large, firm bright red fruit with yellow flesh. Excellent for jam, jelly and baking. Self-pollinating, plant two or more for bigger crop. Mature height and spread 20'. 3-4' stock grows in Zones 4-8

SKU: **FMM-S1** \$37.25

NEW! **NORTH STAR CHERRY** Self-pollinating and may produce in 2nd year. Dark fruit makes excellent pie, jam, wine. Tart cherries about 3/4" round. We recommend the use of bird netting! Well drained sandy, loamy soil. Full sun. 10-12' H x 8-12' W at maturity. Our 3-4' stock grows in Zones 4-8. **SKU: FNC-S1** \$37.25

RED HAVEN PEACH Self-pollinating and fast growing to 15'. Excellent drought tolerance. It doesn't take long to harvest abundant freestone peaches. Adaptable to various soil conditions. Our 2-3' stock grows in Zones 5-9. **SKU: FRP-S1** \$28.20

RELIANCE PEACH Self-pollinating fast grower. Showy pink blossoms in spring. Juicy yellow peaches, blushed with red in mid-summer. Tasty freestone, suitable for cooking, baking, canning and fresh from the tree. Very cold hardy. Can reach up to 25', but best pruned to 12-15'. Our 2-3' stock grows in Zones 4-8 **SKU: FRL-S1** \$28.20

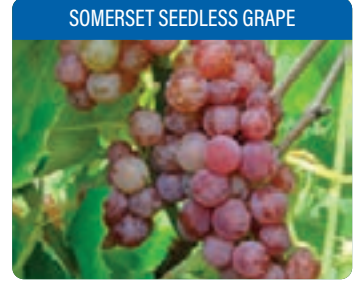

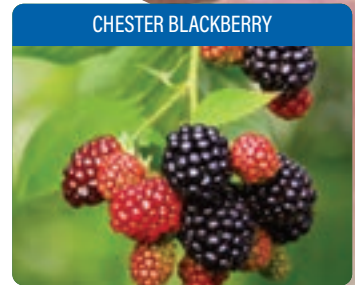

AYERS PEAR A bite into this old southern favorite will reveal a smooth, sweet and melting flesh. The fruit of this pear tree is yellow with a red blush. Ayers are self-pollinating, but will yield a larger crop when planted within 50' of our Bartlett Pear. This vigorous fruit tree is fire blight resistant. Mature height 20'-30' and 12'-15' spread. Our 2-3' stock grows in Zones 5-8.

SKU: **FAP-S1** \$28.65

BARTLETT PEAR The #1 pear worldwide is here! A large yellow-green fruit with juicy white flesh. Good for eating fresh, canning or preserves. Grows to 15-20' in height. Self-fertile, but will produce a heavier crop if planted within 50' of our Ayers Pear. Our 2-3' stock grows in Zones 5-8 **SKU: FBP-S1** \$27.65

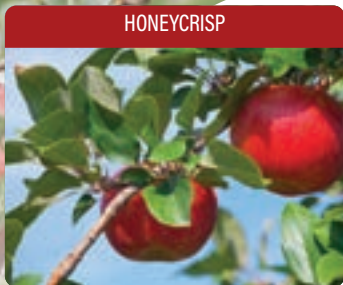

METHLEY PLUM Self-pollinating and heavy bearing plum which will produce multiple harvests of sweet, red-purple fruit each summer. Fast growing, reaching 10-20' high and wide. Heat tolerant and disease resistant. 2-3' stock grows in Zones 5-9 **SKU: FMP-S1** \$26.60

SANTA ROSA PLUM Self-pollinating beautiful pink and white blossoms. Late July the plums are ready to enjoy. Purplish-red skin with yellow to dark red flesh, this clingstone plum is sweet with a little hint of tartness. Great for preserving. Loamy soil, full sun. 20-25' H x 12-15' W at maturity. Our 2-3' stock grows in Zones 5-9 **SKU: FSR-S1** \$26.60

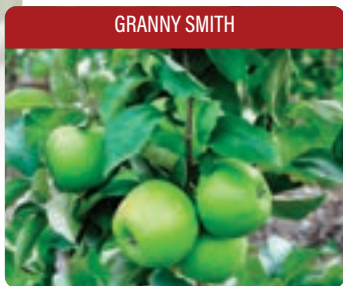

Dormant, Bare Root Apple Trees

- Apple sizes listed do not include root length
- 2 different varieties are required for pollination
- All of our varieties will pollinate each other

HONEYCRISP

FUJI Standard size apple tree will grow to 20' in height. Grows a small to medium size apple with reddish pink to yellow appearance. Fuji apples feature crisp flesh with mild flavor and little tartness. Great for eating fresh, making cider or used in salads. Our 2-3' stock grows in Zones 4-8 **SKU: FFA-SI**..... \$31.75

GRANNY SMITH

GALA Standard size apple tree will grow to 20' in height. One of the most widely grown apples in the U.S. Crisp flesh with a sweet and tangy flavor and is great for eating fresh. Commonly used for making apple sauce and apple cider. Our 2-3' stock grows in Zones 4-8 **SKU: FGA-SI**..... \$31.75

GRANNY SMITH Semi-dwarf size apple tree will grow to 20' in height. Widely known for its green color, this apple is a classic. Bright white and crisp flesh has an acidic and tart taste that generally sweetens over time. Stores up to a year if refrigerated just above freezing. Our 3-4' stock grows in Zones 5-8 **SKU: FGS-SI**..... \$35.65

HONEYCRISP Semi-dwarf apple tree will grow to 12-15' in height. One of the most popular eating apples due to its crisp and extremely juicy flesh. Will make your mouth water every time with its sweet and tangy flavor. Our 3-4' stock grows in Zones 4-8 **SKU: FHA-SI**..... \$36.65

JONATHAN Standard size apple tree will grow to 20' in height. Grows a medium size apple with red skin and yellow/green undertones. Jonathan apples feature creamy yellow flesh with a mildly sweet, tangy tart taste. Used for eating fresh, cooking and dried fruit. Our 2-3' stock grows in Zones 4-8 **SKU: FJA-SI**..... \$31.75

MCINTOSH Semi-dwarf apple tree will grow to 12-15' in height. This all-purpose apple is used for eating fresh, making apple sauce or used in combination with other varieties when baking. The taste ranges from tart to sweet as it continues to ripen. Our 2-3' stock grows in Zones 4-7 **SKU: FMC-SI**..... \$37.90

RED DELICIOUS Standard size apple tree will grow to 20' in height. One of the most popular apples planted in the U.S. This deep red apple exhibits a juicy white flesh that is mild and sweet. Commonly used for eating fresh and desserts. Our 2-3' stock grows in Zones 4-8 **SKU: FRA-SI**..... \$31.75

YELLOW DELICIOUS Standard size apple tree will grow to 20' in height. Grows a large, golden and sweet tasting apple. This apple is eaten fresh, used in baking pies or making sauces and preserves. The taste is sweet and rich with very little acidity. Our 2-3' stock grows in Zones 4-8 **SKU: FYA-SI**..... \$33.75

FUJI

Planting Steps for Success!

Step 1

Soak roots in water for 6-8 hrs. You may use SuperGel or SuperSpore during this process.

Step 2

Plant seedlings, install mulch. Keep mulch 1" away from the seedling stem.

Step 3

Water thoroughly. Seedlings must be watered-in at planting time.

Step 4

Use Plant Saver or Plantskydd® repellents to discourage animal damage. Protect hardwoods with Plantra SunFlex Grow Tube™ Systems. Cage or fence conifers and shrubs.

Step 5

Generally, weekly watering is required. Continue removal of competitive grasses and weeds.

Planting & Care Products

SunFlex Grow Tube™ System

We have teamed up with Plantra® to bring you the SunFlex™ Grow Tube System. These protective grow tubes act like mini greenhouses, growing your seedlings taller, straighter and larger all in record time! Each pack includes grow tubes and extremely strong stakes which will flex to build stem strength but will not rot. Packs also include bird exclusion netting, ties and a stake driver. Available in 5' and 6' sizes. For hardwoods ONLY.

5' tube : MINIMUM height required to protect from deer

- SGT-510 5' Sunflex Systems, pack of 10..... \$160.95
- SGT-520 5' Sunflex Systems, pack of 20..... \$321.90
- SGT-530 5' Sunflex Systems, pack of 30..... \$449.95

6' tube : Recommended height for BEST PROTECTION from deer

- SGT-610 6' Sunflex Systems, pack of 10..... \$165.50
- SGT-620 6' Sunflex Systems, pack of 20..... \$331.00
- SGT-630 6' Sunflex Systems, pack of 30 \$466.60

SuperSpore

Nature to the rescue!

Endo & ecto mycorrhizal fungi combined with SuperGel naturally increases nutrient and water uptake, improving survival rates.

Roots and SuperSpore form a symbiotic association for the lifetime of the tree, making it drought resistant and more adaptable to tough growing conditions.

- SSP-03 3 oz. treats 100 seedlings or 50 transplants..... \$14.95
- SSP-15 15 oz. treats 500 seedlings or 250 transplants..... \$57.95

SuperGel

1oz. FREE with EVERY bare root order of \$175 or more!

SuperGel, with ecto mycorrhizal fungi is used to keep roots moist when your trees are shipped. It stores and releases moisture as the roots need it. With each rain, SuperGel revitalizes to provide a long-term moisture source throughout the initial planting season. Dip roots and plant as usual for extra insurance.

- SGP-02 2oz. treats 1,500 seedlings or 750 transplants \$775

Plantskydd® Animal Repellent

Chief River Nursery has teamed up with Plantskydd® to bring you the best in animal repellents. Plantskydd® repels deer, elk, rabbits, voles and more! It's rain fast in 24 hours, and works year-round. Simply spray the foliage of the target plant and you're done for 3-6 months. Sold in pre-mixed liquid and soluble powder concentrate (mix your own).

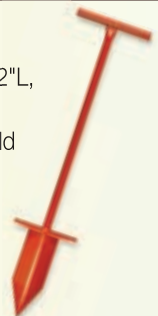

- PSP-QT Ready to use spray bottle, 1 Quart, treats 100 12" tall trees \$26.95
- PSP-GL Ready to use bulk liquid, 1.3 gallons, treats 500-600 12" tall plants \$83.50
- PSP-1 Powder concentrate, 1 lb.-makes 1 gallon, treats 400 12" tall plants \$39.95
- PSP-2 Powder concentrate, 2.2 lbs.-makes 2.5 gallons, treats 900 12" tall plants \$72.95
- PSP-22 Powder concentrate, 22 lbs.-makes 25 gallons, treats 9,000 12" tall plants \$395.95

JIM GEM® KBC Planting Bar

Bar is 39" long, special alloy blade is 4"W x 12"L, 1" thick at top, tapering to a point. Blade and footstep are cast as one piece, the strong weld at the handle and blade joint means this bar will not break or bend.

- KBC-1..... \$79.95

PLANT SAVER Animal Repellent by Chief River Nursery

Our organic Plant Saver Deer & Rabbit Repellent is a safe and effective granular formula used to repel deer and rabbits from your newly planted seedlings or garden. Also effective against elk, and moose. Rain proof, organic formula is safe on all plants and vegetables. Effective 2-3 months when applied to the ground or 4-6 months when placed into bags. Put 2 tablespoons into each bag; install bags every 4-6' on stakes, fences or trees; suspend at a height of 2-4' above the ground. Approximately 1 lb. of Plant Saver Deer & Rabbit Repellent will cover 384 linear feet when the bagged product is installed every 4-6'. **Note:** No deer or animal repellent product can be guaranteed to work in every situation or take the place of a physical barrier.

- PS200..... 2 lb. Plant Saver includes 10 fabric bags..... \$32.95
- PS400..... 4 lb. Plant Saver includes 20 fabric bags..... \$61.50
- PS1000..... 10 lb. Plant Saver includes 50 fabric bags..... \$137.50
- PS2500N 25 lb. Bulk Plant Saver, no bags..... \$214.50
- PS2500 25 lb. Plant Saver includes 100 fabric bags..... \$252.95
- BAG-025..... 25 fabric bags..... \$9.85
- BAG-050..... 50 fabric bags..... \$19.25
- BAG-100 100 fabric bags..... \$36.25

Dear Friends of Chief River Nursery,

This year marks 52 years in business! In 1973 we delivered trees only to our neighbors in Wisconsin. Today, we serve the majority of the United States. 52 years later and tens of millions of trees planted, we want to pause and say - thank you. We sincerely appreciate your loyalty and patronage.

Every year we strive to expand our quality offerings, and this year is no different. We listened to your suggestions and we now offer a Hybrid Chestnut. The nuts are sweet and large like the American Chestnut, but the tree itself has the blight-resistance of the Chinese Chestnut. We are also offering bigger transplant sizes for Balsam Fir (18-24"), Concolor Fir (18-30"), Canaan Fir (18-24"), and Douglas Fir (16-22"). For wildlife enthusiasts, we now offer a wild pear tree which is great for hunting plots. We also brought back our Montmorency and North Star Cherry Trees after several years of non-production.

We're so excited for another great year, and we look forward to serving you with your planting needs!

Kind regards,

Dean & Sheila Koch, Owners

- No customer substitutions allowed on packages
- While unlikely, on discounted package specials we reserve the right to substitute different species and sizes in the event of a crop shortage.

Terms & Conditions

Payment options:

1. Include full payment by check, money order or credit card.
2. Send a deposit of 25% or more with your order. Balance due by March 15th, 2025. This option applies exclusively to orders with a minimum total of \$200.00. Orders placed after March 15th, 2025 must be paid in full.

How to track your order:

An email address is required for all order and shipping confirmations. Without it, you will not receive important information regarding your order. Please submit your email address; it will never be shared.

When to expect your order:

Each Spring, our nursery experts coordinate the shipment of your order once our nursery stock has been lifted and the threat of unfavorable temperatures, snow conditions and ground frost levels in your area have greatly diminished. Orders will be shipped between March 1st and June 15th. If you need to choose a specific week of delivery, you may place your order online prior to April 1st and choose an available week from the calendar during checkout.

Pick up orders:

Customers must contact us to schedule your pickup for date after mid-April. Please remember that we require 3 business days advance notice, prior to your intended pick up date. A \$14.95 packaging fee will be charged on all orders picked up at our Grafton, WI facility, regardless of the order size.

Order cancellations:

When an order is placed, stock is reserved specifically for you and is no longer offered for sale to others. Orders canceled after February 15th, 2025 will incur a cancellation fee equivalent to 25% of the order total. Order modifications or cancellations are not permitted after March 15, 2025.

Sizing:

Our catalog is printed prior to the end of the growing season. We do our very best to accurately determine plant sizes. While unlikely, it is possible that the plants you order will fall outside of the listed size range.

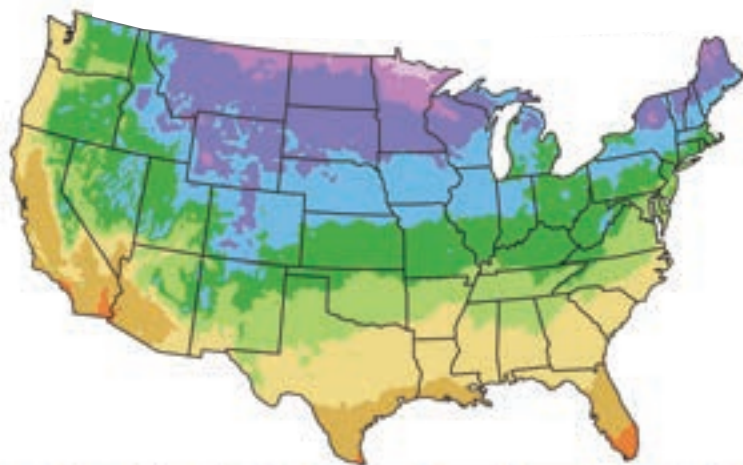

Our Limited Guarantee:

We guarantee you will receive viable nursery stock which will successfully break dormancy by June 30th of the planting year. For complete details of our limited guarantee, [visit www.chiefrivernursery.com/our-guarantee](http://www.chiefrivernursery.com/our-guarantee)

Please note the following time sensitive deadlines, as no exceptions will be made:

- Incorrect or damaged nursery stock must be reported within 24 hours of receipt
- Trees or shrubs that do not break dormancy must be reported by June 30th of the planting year to be considered under the terms of our limited guarantee

Use our **TREE & SHRUB FINDER** online  to help narrow down your choices, by zone, soil type, light requirements & more!

Plant Hardiness Zones

Average Annual Extreme Minimum Temperature in (F°)

Plant hardiness zones were established to help us plant the right plants in the right climates. Planting outside of the recommended zone exposes the plant to a much higher chance of failure.

Please keep in mind that planting your seedling in the correct zone does not ensure its survival. Other important factors such as follow up care, soil type, moisture, drainage, and exposure to the sun and wind will have a direct effect on the survival of your trees and shrubs.
